Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 1-11 are objected to because of the following informalities: In claim 1, "the toe", "the base" and "the legging" lacks proper antecedent basis. In claim 9, "the external portion" lacks proper antecedent basis. In claim 9, "the laces" lack proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 112

1. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble (i.e. A soft boot for sport use, particularly for snowboarding, of the type...) of claim 1 is unclear and indefinite. It is not clear what applicant is trying to claim.

In claim 1, the phrase "characterized by the fact that it provides for the application" is unclear and indefinite.

In claim 5, the phrase "in a condition of pretensioness" is not understood and therefore is indefinite.

In claim 8, it is not clear what area of the foot is the "neck".

In claim 11, the phrase "and similar uses" is vague and indefinite.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3728

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5,7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3765108 (Scott).

Scott teaches a soft boot for sport use (skating) comprising a plate of elastic material (36) wherein the plate is anchored to the boot upper by sewing (34).

Regarding claim 10, the surface is convex and has a smooth surface (a transverse cross-section would show a smooth surface).

4. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6880271 (Caeran).

Caeran teaches a soft boot for sport use (snowboarding and the like; see col. 1, lines 18-21) comprising a plate of elastic material (70) wherein the plate is anchored to the boot upper by sewing (see figure 3 which shows the plate 70 stitched). The laces of Caeran are only present in the external portion (see figure 1) which engages the legging (the laces engage the high keepers which is the legging portion of the boot).

Conclusion

5. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

–“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”

-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments

made to the disclosure. See MPEP 2163.06" MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
